# PATIENT SUCCESS

## Osteoarthritis Solution for Both Knees

*Dr. James Foy, DC, OH*

A 65-year-old male patient had been suffering from pain in his right knee for the past 10 years due to bone on bone osteoarthritis because of a small hole through his right meniscus. The cartilage in his left knee had also begun to deteriorate within the past 2 years. He had tried stretching, cortisone shots, and anti-inflammatories, without any long-term success.

After the consultation with Dr. James Foy, the WHITEE Patches and LC Balancer were recommended. He decided to start treatment on his right knee. **Within the first month, he saw a great reduction in his everyday pain.**

After the first month, he decided to pursue treatment for both knees. After a total of four months of treatment on his right knee and three months on his left knee, he was very pleased with the pain relief that he experienced.
